SMARTER MANAGER JOB COSTING

ONE INTEGRATED SYSTEM, REAL TIME DATA, ACCURATE JOB COSTING – THAT’S SMARTER!

How often have you wished you could immediately look at a job and see your gross margin or, better yet, compare anticipated gross margin from your estimate to your actual?

Questions like these and more can be answered with SMARTer Manager. We understand how critical Job Costing is to your daily operations, and have, therefore, designed a user-friendly interface that uses simple terminology and minimal steps to get your questions answered. We eliminate duplicate data entry by linking our modules so that all your costs can

be captured and associated correctly with each job in real-time. Should you require flexibility for a specific job or for new costs, you may apply changes as they occur. As a result of such versatility and accurate job history, you can perform cost analysis in order to forecast new product manufacturing or even global marketing expansion.

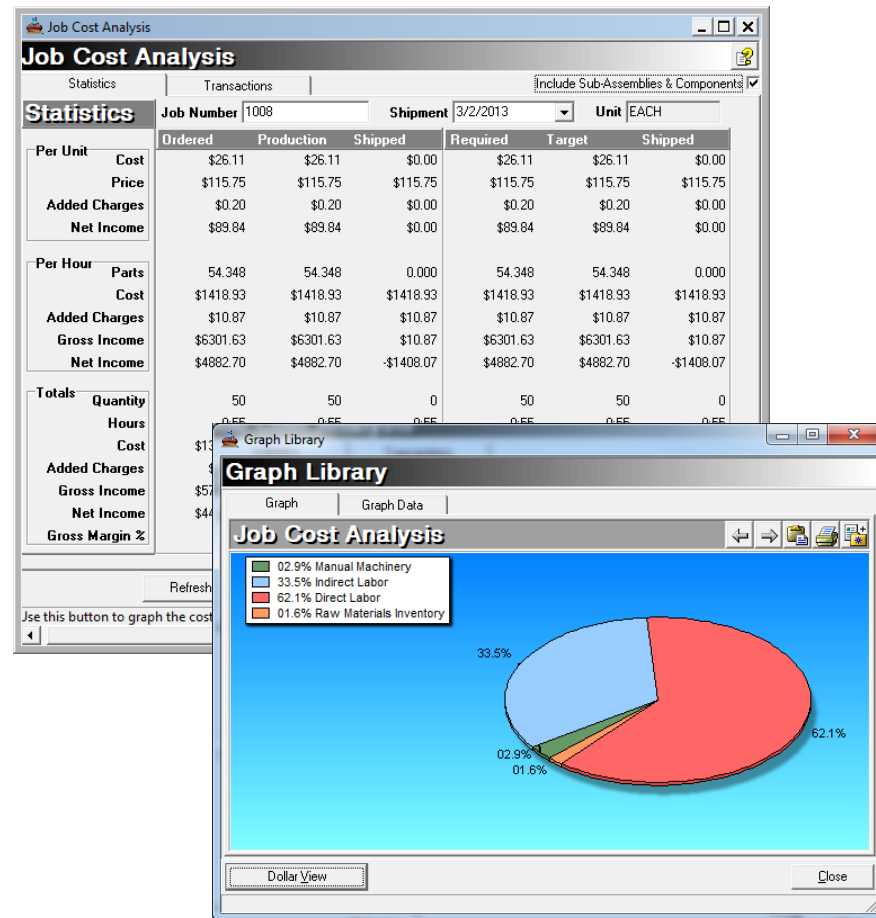

SMARTer Manager Job Costing is just another demonstration of how SME Software helps you with your *vision* for the future.

JOB COSTING FEATURES

- * Real time job costing
- * See costs accumulate on screen
- * Direct link to inventory with each order capturing all costs
- * Direct linking of purchase orders to all financials
- * Track costs to individual shipments
- * Maintain inventory stock levels as items are purchased
- * Ability to associate additional expenses to a work order from the A/P module
- * Activity-based cost accounting, standard, average, LIFO, FIFO, or a costing method of your choice
- * Production margin and cost analysis by part, assembly, company location, department, or market segment
- * Create multiple costs for a designated part

accurate job costing.that’s SMARTer Manager!

JOB COSTING BENEFITS

- * Linking to SMARTer Manager’s Accounting module eliminates duplicate entries between departments.
- * You’re on the phone with the buyer and he wants you to run a job again. You’ll see on screen how much each part costs and the overall profitability. Drilling down to individual job costs is a mouse click away! You can even graph your results using our 3-D graph library.
- * Automatically have your inventory levels increase or decrease as orders are placed and purchase orders are received. Simultaneously reserve inventory and apply the cost to the job.
- * Costs apply to labor, overhead, shipping, subcontractors, and others; now you can track and associate these directly to an individual shipment or an order. Make sure you’re always operating efficiently and competitively.
- * Versatile with costing methods to meet your needs.
- * Make educated decisions for new products, global market expansion, machine/tooling purchases, etc.
- * Different shipments of the same part may have different associated costs due to labor or material. Keep track of those with our discrete costing ability.

WITH SMARTER MANAGER, IT’S EASY!

SMARTer Manager is built around the philosophy that even the most powerful features and complex issues can be easy to master with a carefully and thoughtfully designed product. We sincerely believe that you will find no finer system design or user interface on the market today.

SMALL INVESTMENT.BIG RETURN

SMARTer Manager provides a low-cost, easy-to-implement business and manufacturing system. We enable manufacturers with complete product and real-time visibility all across your supply chain. We empower manufacturers to integrate everything from the front office all the way to the plant floor.
